EXPERIMENT

EXPERIMENT WITH WIND

Get a pencil, and place a tack and thread at the top of it. Measure the wind at certain points around your home or school at different times of the day. Record your findings and identify where the best place for a wind farm would be and what time of day it would get the best result.

| Location | Wind strength | |
|-----------|---------------|---------|
| LUCALIUII | Time | 1 TO 10 |
