

2011-12 TRANSMISSION POSTED PRICE SCHEDULE
(Effective 1 October 2011)

Capacity Reservation Fee ("CRF") = \$/GJ of Reserved Capacity/year
Throughput Fee ("TPF") = \$/GJ delivered
All fees in this schedule are exclusive of GST.

CONFIRMED

Alternative Transmission Services: Kapuni North pipeline

(Note that Vector intends to issue a Change Request relating to Alternative Transmission Services. This section of the Schedule will cease to apply from the effective date of that Change Request)

1. For operational reasons (eg to facilitate pipeline pigging) Vector may occasionally need to reconfigure the Kapuni-Pokuru, Rotowaro South and part of the Rotowaro North pipelines for limited periods.
2. During such periods the normal transmission service from Rotowaro Receipt and Rotowaro South Receipt (respectively) to the Delivery Points listed below will not be available. However, Vector may offer a temporary transmission service from Kapuni North Receipt to such Delivery Points (the *Alternative Transmission Services*).
3. Vector will provide advance notice of any such planned pipeline reconfiguration and Shippers will be required to confirm whether they wish to use the Alternative Transmission Services.
4. For the duration of the Alternative Transmission Services the Delivery Points below (normally part of the North Pipeline) will be deemed to be part of the SKF Pipeline, though current transmission pricing zones will remain unchanged. The Capacity Reservation Fees and Throughput Fee normally applicable for transmission from Rotowaro Receipt and Rotowaro South Receipt (respectively) will continue to be payable (see below).
5. To use the Alternative Transmission Services, a Shipper will need to ship gas to Kapuni GTP (ie using Vector's Frankley Road to Kapuni pipeline). If the Shipper normally sources gas on the Frankley Road pipeline the charges normally payable for shipping such gas to Frankley Road (ie for on-shipping to Rotowaro in the Maui Pipeline) will apply to shipping it to Kapuni GTP instead.
6. If a Shipper normally sources gas on the Maui Pipeline, using the Alternative Transmission Services it would pay lower MDL charges. The saving would be the difference between what the Shipper would have paid MDL to ship its gas from the relevant Maui Welded Point to Rotowaro *minus* the amount it would pay MDL to ship such gas to Frankley Road instead.
7. If a Shipper normally sources gas on the Frankley Road pipeline, using the Alternative Transmission Services it would avoid MDL charges altogether, ie the saving would be what the Shipper would have paid MDL to ship its gas from the Frankley Road Welded Point to Rotowaro.
8. For use of its Frankley Road to Kapuni and/or Kapuni to Rotowaro pipelines, Vector will charge a Shipper no more than the saving in MDL charges referred to in 6 and/or 7 above.
9. A Shipper will be required to notify Vector, on the next business day following a day (or days), from which Maui Welded Point(s) (if any) it sourced its gas on a day (or days), and in what quantities, to enable Vector to determine the Shipper's saving in MDL charges and the amount payable to Vector referred to in 8 above.
10. In respect of the Papakura Delivery Point (PAP06610) only, Vector will determine how each Shipper's Delivery Quantity will be calculated and will advise Shippers thereof when it offers the Alternative Service.

Receipt Point	Delivery Point	ID Number	Note	CRF	TPF
Kapuni North Receipt		KAP09008			
	Greater Hamilton	GTH11301		22	1.014
	Te Kowhai Receipt	TEK28701	(g)	0	0
	Tuakau	TUK06501		126	1.014
	Harrisville	HAR11801		126	1.014
	Papakura 3	PAP06603		60	1.014

CONFIRMED

	Papakura	PAP06610	60	1.014
--	----------	----------	----	-------

Notes:

1 The names of some Receipt Points or Delivery Points may differ slightly from those in OATIS. Vector reserves the right to amend any name and/or ID Number at any time.

2 Where the CRF and TPF are shaded grey, no Posted Price currently exists.

3 "DF" means dairy factory.

4 Standard transmission charges are calculated with reference to the above Capacity Reservation Fees and Throughput Fee(s) in accordance with the Vector Transmission Code.

Briefly, in respect of a Receipt Point and Delivery Point and a day, such charges are calculated as follows:

Capacity Reservation Charge: $CRF \times Reserved\ Capacity \div 365$ (or 366 in a leap year);

Throughput Charge (subject to note (c)): $TPF \times Delivery\ Quantity$;

Overrun Authorisation Charge: $CRF \times Authorised\ Overrun\ Quantity \div 365$ (or 366 in a leap year);

Authorised Overrun Charge: $CRF \times 8 \times Overrun\ Quantity\ Within\ Authorisation \div 365$ (or 366 in a leap year); and

Unauthorised Overrun Charge: $CRF \times 10 \times Unauthorised\ Overrun\ Quantity \div 365$ (or 366 in a leap year);

5 There are 8 shippers on the gas transmission system as at 1 October 2011.

(a) South-Auckland rural zone.

(b) Auckland zone.

(c) This TPF will be applied only to GJ delivered in excess of a Shipper's aggregate Reserved Capacity (if any) to Kapuni GTP.

(d) Okaiawa-Manaia zone.

(e) Manawatu zone.

(f) Wellington zone.

(g) A Shipper will be deemed to have Reserved Capacity from Rotowaro South Receipt to Te Kowhai equal to the aggregate of its Reserved Capacity downstream of Te Kowhai Receipt.

(h) Kinleith zone.

(i) Tirau zone.

(j) Western Bay of Plenty zone.

(k) Kawerau zone.

CONFIRMED

- (l) Edgecumbe zone.
- (m) Kiwitahi zone.
- (n) Morrinsville zone.
- (o) An interruptible service may be available, for a fee of \$0.22/GJ of Interruptible Capacity.
- (p) New Plymouth zone.
- (q) An interruptible service only is available from Kapuni to Pokuru 2, for a fee of \$0.45/GJ of Interruptible Capacity.
- (r) The Receipt Point is also the Delivery Point, ie the Delivery Point is directly connected to the Maui Pipeline.
- (s) An interruptible service only is available to NZRC.
- (t) Capacity is "implicit", hence no transmission charge applies.
